

# UNDER CONSTRUCTION

## Rialto sound walls: Five down, four to go

Five sound walls along Highland Avenue in Rialto now are complete, with the remaining four others in various stages of construction.

Three of the completed walls are south of the freeway corridor and two of the completed walls are north of the corridor. All of the five walls are located between Spruce and Riverside Avenues. The remaining four walls scheduled for construction include:

- A wall between Spruce and Cactus, north of the future freeway. The installation of masonry block is set to start March 18.
- A wall from Willow Avenue to a point just west of the Rancho Verde Plaza, north of the future freeway. Crews will place temporary fencing and start the concrete footing on March 18.
- A wall between Tahoe and Riverside, south of the future freeway. Block work is planned to begin the week of March 22.
- A wall between Sycamore and Acacia, east of Riverside Avenue and south of the future freeway.

**Crews install masonry block on this sound wall near Lilac Avenue, which was completed in February.**

## Improvements to Ayala, Baseline nearly complete

The first phase of street improvements on Ayala Drive and Baseline in Rialto wrapped up March 15.

These improvements will help with the detour of vehicles from Highland Avenue later this year.

Completed improvements include the widening of Baseline between Cactus and Fitzgerald Avenues to two lanes in both directions and the widening of Ayala between Easton and Baseline to include two southbound lanes.

The second phase of the detour project will place traffic signals at the intersections of Ayala and Riverside and Ayala and Bohnert, both of which now have stop signs. Upgraded traffic signals will be placed along Baseline at Ayala, Cactus, Lilac, Willow and Riverside. Work on the new traffic signals is expected to finish in April.

## Riverside, Ayala, Linden bridges under construction

Bridge construction is underway at Ayala Drive, Linden Avenue and, most recently, Riverside Avenue.

Work on Ayala started in mid-February and is on schedule, despite rainy weather. Construction of the Linden bridge started earlier this month. Excavation for the Riverside bridge began March 18. The bridges all are expected to be completed this fall.

To date, bridges at Alder Avenue and Locust Avenue have been completed. These bridges are located at the western end of the final eight miles of the project.
